OPUS N°4

HOME AUDIO SOLUTION

Quality sound never looked so good. Or was so easy.

Without a question, the all-new Olive OPUS N°4 is a strikingly beautiful device. But its real beauty goes well beyond what it looks like. We've made the OPUS N°4 the easiest to use, most convenient way to enjoy high quality music, in any room of your home. So, get ready to enjoy music the way it was meant to be enjoyed.

Highlights

- Store up to 3,000 of your CDs in lossless quality.
- One simple button-click rips, tags and archives your CD.
- Quickly find your music with the intuitive touch screen interface.
- Enjoy your music anywhere at home, in up to 15 rooms simultaneously.*
- Setup is a snap. Wired or wireless networking capability.

* Requires Olive MELODY N°2 (optionally available)

OPUS N°4

HOME AUDIO SOLUTION

The new OPUS N°4 delivers exceptional sound quality and all the benefits you'd expect from superior digital technology - like convenience and scalability (except that it is really, really easy to use). What else could you want? Oh, yeah...it's beautiful too.

Find what you want, fast.

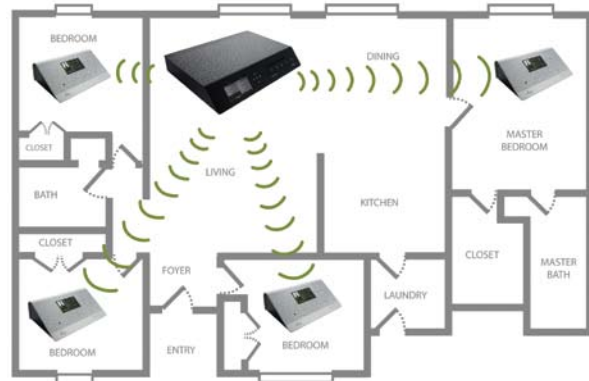

Thanks to the OPUS' super intuitive touch-screen interface and Olive's patent-pending MusicAware™ technology you will find the right music faster than ever. Even better, you can use any network-enabled portable device to do it all from the comfort of your sofa.

Rip, mix and burn with your stereo? Easy.

It couldn't be simpler. Just insert your CD, push the record button, and a few minutes later your music is loaded, appropriately tagged and neatly categorized - automatically! At that point, creating playlists is something you can do at the touch of a button. Want to put your playlist on a CD? Push a button and you're done.

A radio on steroids.

Extend your musical repertoire by listening to (commercial)-free internet radio stations delivered to your stereo system, while getting detailed information about the artist, album and track that is currently playing.

Play different music in every room.

Extend the fun throughout the house. Connect the OPUS N°4 to the new MELODY N°2 and you can stream your music to another room in the house. Each OPUS can support as many as 15 different MELODYs playing different songs in each room.

Save the sound.

The OPUS N°4 incorporates a low noise power supply, special ultra-quiet hard drives, a passive cooling concept (without a noisy fan), and a high-resolution Digital-to-Analog converter to deliver breathtaking sound. Sit back and enjoy your favorite tunes in high quality sound. Or get up and dance.

Plug it in and play. No PC needed.

Setting up your OPUS is as simple as connecting a standard CD Player. As a true standalone solution the OPUS does not require a PC/Mac, software installation or virus protection to keep your music from harm. We're all about keeping it simple.
