## EZY 7 iPod Stereo Receiver

iPod not included

The EZY 7 music centre might be thought of as simply a good-looking component, but it's really much more. The EZY 7 combines three units in one: a high performance 50 watt amplifier, a high-sensitivity AM/FM tuner, and an iPod dock.

The EZY 7 features high quality internal components and circuit design, along with uncompromising manufacture quality. Combined, these elements allow the emotion and depth of your music to move you, and will provide fatigue-free listening enjoyment

The components are carefully selected and sorted. The 2 x 50 watts power output is suitable for driving many of today's loudspeakers, and the high sensitivity AM/FM tuner features 30 presets for your favourite stations.

The inputs available on the EZY 7 allow connection to many different sources. It offers four analogue inputs, along with an iPod docking cradle on the front panel for simple connection of your iPod. A "Pre" output is also included.

The remote supplied with the EZY 7 offers great user convenience, and can also control an iPod.

### Technical data:

Power Output – 4 ohms	2 x 50 watts
Frequency Response	10Hz-45kHz - 3dB
Total Harmonic Distortion	0.25%
Signal to Noise	> 90dB
Channel Separation	≥ 85dB
Input Impedance	10 Kohms
