BEST INTERNET RADIO

Tangent Quattro £180

(Bottom left) It's hard to get it wrong when it comes to internet radio – the basic principle is so exciting – though some manufacturers have tried. Not Tangent, though, which hits the wi-fi hi-fi bullseye this year with its outstanding Quattro model.

Similar to the Vita R2 in its quality of build and potent desirability, the Quattro is a doddle to use, tunes to thousands of stations fast and serves up a weighty, well-separated sound, even if the received signal is at a miserly bitrate. That upward-firing speaker makes the Tangent a mite tricky to position, but the sound it offers is better than any other internet radio we've listened to this year.
